: This material may have the potential to be ignited by static electricity during handling or processing. Use proper grounding techniques when handling this product to avoid electrostatic charges. A detailed static evaluation is recommended for liquid handling/processing operation to determine the potential for generating and accumulating static charge. Reference NFPA 77 "Recommended Practice on Static Electricity" for further safe handling practices.

**Please note:** Mixtures have not been tested for health hazards. The health hazard information presented is provided in accordance with US 29 CFR 1910.1200 and is based on the testing of individual components which have been shown to cause or may cause these health effects when tested at higher concentrations or at full strength.

### Ingredients with unknown acute toxicity.:

The following percentage of the mixture consists of ingredient(s) with unknown acute toxicity: **0 %**

## SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

### Hazardous components

Component	CAS-No.	Concentration [%]
2-propanol	67-63-0	20.00 - 30.00
propane-1,2-diol	57-55-6	10.00 - 20.00

#### Most important symptoms and effects, both acute and delayed

May cause an allergic skin reaction.  
Causes serious eye irritation.  
May cause drowsiness or dizziness.

#### Indication of any immediate medical attention and special treatment needed

no data available

## SECTION 5. FIREFIGHTING MEASURES

### Extinguishing media

Suitable extinguishing media : Water spray  
Alcohol-resistant foam  
Carbon dioxide (CO<sub>2</sub>)  
Dry chemical

Unsuitable extinguishing media : High volume water jet

### Special hazards arising from the substance or mixture

Specific hazards during firefighting : Do not allow run-off from fire fighting to enter drains or water courses.  
Exposure to decomposition products may be a hazard to health.  
Do not use a solid water stream as it may scatter and spread

fire.

Cool closed containers exposed to fire with water spray.

#### Advice for firefighters

Special protective equipment for firefighters : Wear self-contained breathing apparatus for firefighting if necessary.

Further information : Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.  
In the event of fire and/or explosion do not breathe fumes.

## SECTION 6. ACCIDENTAL RELEASE MEASURES

#### Personal precautions, protective equipment and emergency procedures

Remove all sources of ignition.

Evacuate personnel to safe areas.

Keep people away from and upwind of spill/leak.

In the case of vapour formation use a respirator with an approved filter.

Use personal protective equipment as required.

For emergency conditions, use an approved positive-pressure self-contained breathing apparatus.

Beware of vapours accumulating to form explosive concentrations. Vapours can accumulate in low areas.

Material can create slippery conditions.

#### Environmental precautions

Retain and dispose of contaminated wash water.

The product should not be allowed to enter drains, water courses or the soil.

Dispose of in accordance with local regulations.

Local authorities should be advised if significant spillages cannot be contained.

#### Methods and materials for containment and cleaning up

Remove all sources of ignition.

Use only non-sparking tools.

Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).

Keep in suitable, closed containers for disposal.

Clean contaminated floors and objects thoroughly while observing environmental regulations.

Provide adequate precautions, such as electrical grounding and bonding, or inert atmospheres.

## SECTION 7. HANDLING AND STORAGE

### Precautions for safe handling

- Advice on safe handling : Avoid contact with skin and eyes.  
Open drum carefully as content may be under pressure.  
Keep away from heat/sparks/open flames/hot surfaces. No smoking.  
When using do not eat, drink or smoke.
- Advice on protection against fire and explosion : Use explosion-proof equipment.  
Keep away from heat and sources of ignition.

### Conditions for safe storage, including any incompatibilities

- Requirements for storage areas and containers : Keep container tightly closed in a dry and well-ventilated place.  
Store in cool place.  
Containers which are opened must be carefully resealed and kept upright to prevent leakage.  
Provide adequate precautions, such as electrical grounding and bonding, or inert atmospheres.
- Further information on storage conditions : Ambient / 10-30°C (50 -85°F)  
Preferably full, hermetically sealed
- Advice on common storage : no data available

**Exposure Assessment:** Exposures are dependent on the product being handled, the potential for chemical release, and any resulting airborne concentrations or dermal contact. Since product handling and release scenarios vary, and no two workplaces are exactly alike, it is recommended that the potential for exposure be assessed prior to the product's use or introduction. Exposure assessments should be performed by an occupational hygienist, industrial hygienist, or other qualified occupational or environmental health professional. An exposure assessment should be conducted to determine the efficacy of any ventilation and the need for additional respiratory protection.

**Engineering measures**

**Ventilation:** Use engineering controls to maintain airborne levels below exposure limit requirements or guidelines. If there are no applicable exposures limit requirements or guidelines, use only with adequate ventilation. Local exhaust ventilation may be necessary for some operations.

| Protective measures      | : Choose PPE based on a hazard assessment, taking into account to the concentration and amount of dangerous substances, and to the specific work-place conditions.  |
| Eye protection           | : Ensure that eyewash stations and safety showers are close to the workstation location.<br>Wear chemical splash goggles (non-vented) with faceshield.  |
| Hand protection          | : Wear chemical resistant gloves suitable for this material as determined by a hazard assessment.<br>Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.  |
| Skin and body protection | : Wear protective clothing suitable for this material as determined by a hazard assessment.   |
| Respiratory protection   | : Respiratory protection should be worn when workplace exposures exceed exposure limit requirements or guidelines. If there are no applicable exposure limits or guidelines, use an approved respirator where there is a potential for adverse effects, including but not limited to respiratory irritation or odor, where indicated or required by the exposure assessment. Selection of air-purifying or positive-pressure supplied air will depend on the results of the exposure assessment which includes an evaluation of the specific operations and the actual or potential airborne concentrations. The type of cartridge or filter to be used must be selected and approved for the chemical, class, or classes of chemical(s) likely to be encountered in the workplace. For emergency conditions, use an approved positive-pressure self-contained breathing apparatus. |
| Hygiene measures         | : Handle in accordance with good industrial hygiene and safety practice.<br>Remove contaminated clothing and protective equipment before entering eating areas.<br>Wash hands before breaks and immediately after handling the product.   |

See Section 16 for further information.
