

Revision date: 2015/01/12 Page: 1/9
Version: 1.0 (30036546/SDS\_GEN\_US/EN)

#### 1. Identification

Product identifier used on the label

# ULTRADUR® B 4300 K4 UNCOLORED POLYBUTYLENE TEREPHTHALATE

#### Recommended use of the chemical and restriction on use

Recommended use\*: Polymer; for industrial processing only Suitable for use in industrial sector: Polymers industry

#### Details of the supplier of the safety data sheet

Company:
BASF CORPORATION
100 Park Avenue
Florham Park, NJ 07932, USA

Telephone: +1 973 245-6000

#### **Emergency telephone number**

CHEMTREC: 1-800-424-9300

BASF HOTLINE: 1-800-832-HELP (4357)

#### Other means of identification

Molecular formula: (C12H12O4)N

Synonyms: Poly(butylene terephthalate)

#### 2. Hazards Identification

#### According to Regulation 2012 OSHA Hazard Communication Standard; 29 CFR Part 1910.1200

#### Classification of the product

No need for classification according to GHS criteria for this product.

#### Label elements

<sup>\*</sup> The "Recommended use" identified for this product is provided solely to comply with a US Federal requirement and is not part of the seller's published specification. The terms of this Safety Data Sheet (SDS) do not create or infer any warranty, express or implied, including by incorporation into or reference in the seller's sales agreement.

Revision date: 2015/01/12 Page: 2/9 Version: 1.0 (30036546/SDS GEN US/EN)

The product does not require a hazard warning label in accordance with GHS criteria.

#### Hazards not otherwise classified

No specific dangers known, if the regulations/notes for storage and handling are considered.

#### According to Regulation 1994 OSHA Hazard Communication Standard; 29 CFR Part 1910.1200

#### **Emergency overview**

#### CAUTION:

MAY CAUSE EYE, SKIN AND RESPIRATORY TRACT IRRITATION.

INGESTION MAY CAUSE GASTRIC DISTURBANCES.

Use with local exhaust ventilation.

Respiratory protection may not be required under normal operating conditions if adequate ventilation is provided.

Wear NIOSH-certified chemical goggles.

Wear protective clothing.

Eye wash fountains and safety showers must be easily accessible.

#### 3. Composition / Information on Ingredients

#### According to Regulation 2012 OSHA Hazard Communication Standard; 29 CFR Part 1910.1200

CAS Number	Content (W/W)	Chemical name
65997-17-3	>= 15.0 - <= 30.0 %	Glass, oxide, chemicals

#### According to Regulation 1994 OSHA Hazard Communication Standard; 29 CFR Part 1910.1200

CAS Number	Content (W/W)	Chemical name
30965-26-5	>= 30.0 - <= 50.0 %	polybutylene terephthalate (PBT)
26062-94-2	>= 30.0 - <= 50.0 %	polybutylene terephthalate (PBT)
65997-17-3	>= 15.0 - <= 30.0 %	Glass, oxide, chemicals

#### 4. First-Aid Measures

#### **Description of first aid measures**

#### **General advice:**

Avoid contact with the skin, eyes and clothing. Remove contaminated clothing.

#### If inhaled:

Remove the affected individual into fresh air and keep the person calm. Assist in breathing if necessary. Consult a physician.

#### If on skin:

Wash thoroughly with soap and water. Burns caused by molten material require hospital treatment.

#### If in eyes:

In case of contact with the eyes, rinse immediately for at least 15 minutes with plenty of water. If irritation develops, seek medical attention.

Revision date: 2015/01/12 Page: 3/9 Version: 1.0 (30036546/SDS GEN US/EN)

#### If swallowed:

Rinse mouth and then drink plenty of water. Ingestion is not likely in the available physical form. If ingested, seek medical attention.

#### Most important symptoms and effects, both acute and delayed

Symptoms: No significant reaction of the human body to the product known. Hazards: No hazard is expected under intended use and appropriate handling.

#### Indication of any immediate medical attention and special treatment needed

Note to physician

Treatment: Treat symptomatically.

#### 5. Fire-Fighting Measures

#### **Extinguishing media**

Suitable extinguishing media: water spray, foam, dry powder

#### Special hazards arising from the substance or mixture

Hazards during fire-fighting:

carbon monoxide, tetrahydrofuran, can be emitted at > 290 °C

Under special fire conditions traces of other toxic substances are possible. Formation of further decomposition and oxidation products depends upon the fire conditions.

#### Advice for fire-fighters

Protective equipment for fire-fighting:

Firefighters should be equipped with self-contained breathing apparatus and turn-out gear.

#### Further information:

Dispose of fire debris and contaminated extinguishing water in accordance with official regulations.

#### 6. Accidental release measures

Further accidental release measures:

High risk of slipping due to leakage/spillage of product.

#### Personal precautions, protective equipment and emergency procedures

No special precautions necessary.

#### **Environmental precautions**

No special precautions necessary.

#### Methods and material for containment and cleaning up

For small amounts: Pick up with suitable appliance and dispose of. For large amounts: Pick up with suitable appliance and dispose of.

Revision date : 2015/01/12 Page: 4/9 Version: 1.0 (30036546/SDS\_GEN\_US/EN)

### 7. Handling and Storage

#### Precautions for safe handling

Avoid inhalation of dusts/mists/vapours.

Protection against fire and explosion:

Take precautionary measures against static discharges.

#### Conditions for safe storage, including any incompatibilities

The product in undamaged packing need not be stored separately.

Suitable materials for containers: Low density polyethylene (LDPE), High density polyethylene (HDPE), Stainless steel, aluminum

Further information on storage conditions: Keep container tightly closed. Avoid deposition of dust. Protect against moisture.

Storage stability:

Protect against moisture.

#### 8. Exposure Controls/Personal Protection

#### Components with occupational exposure limits

Glass, oxide, chemicals

ACGIH TLV TWA value 5 mg/m3 Inhalable fraction; TWA

value 1 fibers/cm3 Fiber;

Respirable fibers: length > 5 micrometers; aspect ration >= 3:1, as determined by the membrane filter method at 400-450X magnification (4-mm objective), using phase-contrast illumination.

#### Advice on system design:

Provide local exhaust ventilation to control dusts/vapours.

#### Personal protective equipment

#### Respiratory protection:

Wear a NIOSH-certified (or equivalent) particulate respirator. Wear respiratory protection if ventilation is inadequate. Do not exceed the maximum use concentration for the respirator facepiece/cartridge combination.

#### Hand protection:

Wear gloves to prevent contact during mechanical processing and/or hot melt conditions.

#### Eye protection:

Tightly fitting safety goggles (chemical goggles).

#### **Body protection:**

Body protection must be chosen based on level of activity and exposure.

#### General safety and hygiene measures:

Wear protective clothing to prevent contact during mechanical processing and/or hot melt conditions. Avoid inhalation of dust.

Revision date : 2015/01/12 Page: 5/9
Version: 1.0 (30036546/SDS\_GEN\_US/EN)

#### 9. Physical and Chemical Properties

Form: pellets Odour: odourless

Odour threshold: not applicable Colour: various, depending on the colourant

pH value: various, depending on the colourant not applicable

melting range: 220 - 230 °C (DIN 53736)

Boiling range: The substance / product decomposes

therefore not determined.

Sublimation point:

No applicable information available.

Flash point:

No applicable information available.

Flammability: not self-igniting

Flammability of Aerosol not applicable, the product does not form

Products: flammable aerosoles)

Lower explosion limit: The substance / product decomposes

therefore not determined.

Upper explosion limit: The substance / product decomposes

therefore not determined.

Autoignition: 350 °C (ASTM D1929) Vapour pressure: not applicable

Density: 1.3 - 1.8 g/cm3 (20 °C) (EN ISO 1183-1)

Relative density: No data available.

Bulk density: 600 - 900 kg/m3

Vapour density: not applicable Partitioning coefficient n- not applicable

octanol/water (log Pow):

Self-ignition not self-igniting

temperature:

Thermal decomposition: > 290 °C

Thermal decomposition above the indicated temperature is

possible.

Viscosity, dynamic: not applicable, the product is a solid Viscosity, kinematic: not applicable, the product is a solid

Solubility in water: insoluble

Solubility (quantitative): No applicable information available.

Solubility (qualitative): No applicable information available.

Evaporation rate: The product is a non-volatile solid.

### 10. Stability and Reactivity

#### Reactivity

No hazardous reactions if stored and handled as prescribed/indicated.

#### **Chemical stability**

The product is stable if stored and handled as prescribed/indicated.

#### Possibility of hazardous reactions

The product is chemically stable. No hazardous reactions known.

#### **Conditions to avoid**

Temperature: > 290 degrees Celsius

Revision date: 2015/01/12 Page: 6/9 Version: 1.0

(30036546/SDS\_GEN\_US/EN)

#### Incompatible materials

No substances known that should be avoided.

#### Hazardous decomposition products

Decomposition products:

Hazardous decomposition products: carbon monoxide, tetrahydrofuran, terephthalic acid, carbon dioxide, Water

Thermal decomposition:

> 290 °C

Thermal decomposition above the indicated temperature is possible.

### 11. Toxicological information

#### Primary routes of exposure

Routes of entry for solids and liquids are ingestion and inhalation, but may include eye or skin contact. Routes of entry for gases include inhalation and eye contact. Skin contact may be a route of entry for liquefied gases.

#### **Acute Toxicity/Effects**

#### Acute toxicity

Assessment of acute toxicity: Contact with molten product may cause thermal burns.

The resin in pelleted form poses a low hazard.

#### Oral

No applicable information available.

Not inhalable due to the physico-chemical properties of the product.

No applicable information available.

#### Assessment other acute effects

No applicable information available.

#### Irritation / corrosion

Assessment of irritating effects: Thermal decomposition products of the substance can irritate the eyes, skin, and respiratory tract.

Assessment of sensitization: Based on our experience and the information available, no adverse health effects are expected if handled as recommended with suitable precautions for designated uses.

#### **Aspiration Hazard**

No aspiration hazard expected.

#### **Chronic Toxicity/Effects**

Revision date: 2015/01/12 Page: 7/9 Version: 1.0 (30036546/SDS GEN US/EN)

#### Repeated dose toxicity

Assessment of repeated dose toxicity: Based on our experience and the information available, no adverse health effects are expected if handled as recommended with suitable precautions for designated uses.

#### Genetic toxicity

Assessment of mutagenicity: Based on our experience and the information available, no adverse health effects are expected if handled as recommended with suitable precautions for designated uses.

#### Carcinogenicity

Assessment of carcinogenicity: Based on our experience and the information available, no adverse health effects are expected if handled as recommended with suitable precautions for designated uses.

#### Reproductive toxicity

Assessment of reproduction toxicity: Based on our experience and the information available, no adverse health effects are expected if handled as recommended with suitable precautions for designated uses.

#### Other Information

Based on our experience and the information available, no adverse health effects are expected if handled as recommended with suitable precautions for designated uses.

#### Symptoms of Exposure

No significant reaction of the human body to the product known.

#### 12. Ecological Information

#### **Toxicity**

Aquatic toxicity

Assessment of aquatic toxicity:

The product has not been tested. The statement has been derived from the structure of the product.

There is a high probability that the product is not acutely harmful to aquatic organisms.

#### Persistence and degradability

#### Assessment biodegradation and elimination (H2O)

The product is virtually insoluble in water and can thus be separated from water mechanically in suitable effluent treatment plants.

#### **Bioaccumulative potential**

#### Bioaccumulation potential

The product will not be readily bioavailable due to its consistency and insolubility in water.

#### 13. Disposal considerations

#### Waste disposal of substance:

Check for possible recycling. Incinerate in suitable incineration plant, observing local authority regulations.

Revision date : 2015/01/12 Page: 8/9
Version: 1.0 (30036546/SDS\_GEN\_US/EN)

#### Container disposal:

Packs must be completely emptied. Completely emptied packagings can be given for recycling.

### 14. Transport Information

#### Land transport

USDOT

Not classified as a dangerous good under transport regulations

#### Sea transport

**IMDG** 

Not classified as a dangerous good under transport regulations

### Air transport

IATA/ICAO

Not classified as a dangerous good under transport regulations

#### 15. Regulatory Information

#### **Federal Regulations**

#### **Registration status:**

Chemical TSCA, US released / listed

**EPCRA 311/312 (Hazard categories):** Not hazardous;

#### **State regulations**

State RTK CAS Number Chemical name

MA, NJ, PA 65997-17-3 Glass, oxide, chemicals

NFPA Hazard codes:

Health: 1 Fire: 1 Reactivity: 0 Special:

**HMIS III rating** 

Health: 1 Flammability: 1 Physical hazard:0

#### 16. Other Information

#### SDS Prepared by:

BASF NA Product Regulations SDS Prepared on: 2015/01/12

We support worldwide Responsible Care® initiatives. We value the health and safety of our employees, customers, suppliers and neighbors, and the protection of the environment. Our commitment to Responsible Care is integral to conducting our business and operating our facilities in
